Here are some snippets of their takeaways during the leadership seminar:

"You must have positive communication skills in order to be one of the most powerful influencers in the workplace, whether by congratulating, encouraging, giving orders, or criticizing them ... having a sense of unity and accountability that always steps up and accepts responsibility. Finally, empathy requires us to understand the perspective of the other person."

John Kevin S. Rafal
President, Information & Communication
Technology Students' Society

Angel Nieves
Secretary, Educators Society

"Since I was in high school, I've spent the majority of my time as a leader ... However, I am short-tempered and easily irritated when my team members fail to fulfill my expectations when I assign them tasks. But, after the webinar, I realize that I should always put myself in other people's shoes; I should understand where they're coming from, and I should take their reasons seriously rather than dismissively."
